ABOUT ME

In pursuing computer science & engineering i have been fascinated by technologies in general and computers in particular from the beginning. I possess a great thirst for knowledge and learning new disciplines and inspired by the subjects complexity and beauty.

PROJECT

FUND COLLECTION WEBSITE

Project Duration:
3 Month

This is a platform of collecting money by crowd funding to make a meaningful charitable reason successful. This website offers only a service where there will be no payment gateway system and it does not take the responsibility of the amount of donation. It will help user to create an event with users given bank account information. And all donation will go for user given bank or mobile banking account.

ECOMMERCE ANDROID APPLICATION

Project Duration:
3 Month

This application includes everything you need to set up your online store and sell online. Use your staff account to login to the administration area. From there you can build your ecommerce website, then manage and accept credit card orders.
